Foreword	3
1. WATER LOSSES	4
1.1 Origin of water losses	4
1.2 Definition of water losses	8
1.3 Determination of water losses	11
1.4 What the leak locator has to know about a water supply	14
1.5 Control of water losses	16
2. PRE-DETECTION OF WATER LEAKS	20
2.1 Listening rod	20
2.2 Sound logger	20
2.3 Zero consumption measurement	20
2.4 Pressure test	23
3. PINPOINTING WATER LEAKS	24
3.1 Ground microphone	24
3.2 Correlator	26
3.2.1 Working mode of the correlator	27
3.2.2 Limits of the correlator	30
3.2.3 Control of water networks with the correlator	33
3.2.4 Use of hydrophones	34
3.2.5 Control of the measurements	34
3.2.6 Evaluation of correlators	35
3.3 Air	37
3.4 95/5 nitrogen-hydrogen mix	37
3.5 Thermic camera	38
3.7 Ground radar	39
3.6 Miniature pipe camera	39
3.8 Divining rod	40
3.9 Devices for pipe location	41
3.10 Which devices does a qualified leak locator need?	43
3.11 Excavation guarantee	43
3.12 Lowering guarantee	45
3.13 Maintenance contracts	46
3.14 Invitation to tender through the water supply	47
3.15 How to become a leak locator?	48
3.16 Leak locating at water supplies	49
3.17 Costs of reduction of water losses	51
4. SAFETY	52
5. TRAINING	52
Illustration index	53
